4. In view of Applicant's amendment, the 35 USC § 112 rejections have been withdrawn.
5. In view of Applicant's amendment, the 37 CFR 1.75 objections to claims 18 and 19 (cancelled) have been withdrawn.

DETAILED ACTION

New Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 9 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawano (US 6,897,983).

Regarding claim 9, and similarly claim 25, Kawano discloses

- dividing a color digital image into a plurality of image areas [Fig. 2, ref. 25; Col. 15, lines 20-25. Note that the image is separated (i.e., divided) into smaller areas; further note that each pixel has R, G and B colors (Col. 15, lines 12-15)]
- for each of the image areas, calculating a respective color conversion matrix based on the color values of the image area [Fig. 2, refs. 26 & 27 (in combination determines, or calculates, filters to apply according to the areas being processed); Fig. 3 (showing the process flow of Fig. 2; also showing that each filter is a matrix); Col. 15, lines 43-46; Col. 15, line 64-Col. 16, line 15. Note that the color values are changed by the filter processing section of Fig. 2, ref. 27. Per P. 3, lines 1-15 of the specification of instance application (changing the values of the R, G and B colors) such filtering is considered a color conversion operation]
- color converting each of the image areas by applying the respective color conversion matrix to color values of the image area [Fig. 2, refs. 26 & 27. Note that conversion is carried out at Fig. 2, ref. 27]

Allowable Subject

9. Claims 1-8 and 21-24 are allowed.
10. Claims 10, and similarly claim 26, is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 11, 13-15 and 17, being dependent from claim 10, are similarly objected to but would be allowable should claim 10 be so rewritten.
11. The following is a statement of reasons for the indication of allowable subject matter:
 - A. Regarding claims 1, 10, 23 and 26, closest art of record, alone or in combination, does not disclose, teach or suggest the color conversion matrix as recited in the claims.

Conclusion and Contact Information

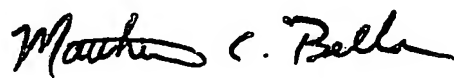

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
